Memorandum Geo1 June 2014:

Assembling the Archipelago: Heritage in Energy Transitions and Climate Action Marilena Mela, 2025-09-09 This book explores the potential of heritage to enact sustainable human environment relationships across geographical differences. It does so by travelling to four archipelagoes: the Wadden Islands in the Netherlands, the Cyclades in Greece, Shetland in Scotland, and the Aeolian Islands in Italy. In the face of planetary socioenvironmental crises, the reliance on sustainable development strategies including the energy transition on technocratic top-down solutions fail to counterbalance global agendas of extraction and growth and address environmental injustices in peripheral places. This book stresses the need to think small, arguing that seeds for meaningful change exist in such places and the geographically and historically situated relationships between people and environments. Islands, interconnected yet autonomous places with unique histories, are good places to start. In four archipelagoes, frictions produced both by climate change and climate mitigation: the fragile consensus around a solar park in the Wadden Sea, conflicts around wind turbine towers in the Aegean, experiments with the tides in Shetland, and volcanic episodes in the Aeolian, come in dialogue with the learning potential of their environmental and cultural heritage. The counterposing of these stories renegotiates established discourses of heritage and sustainability and the associated courses of action in policy and planning. This contribution will resonate with academics, students, policymakers, and activists in heritage studies, environmental humanities, landscape studies, science and technology studies, and sustainability. Readers are invited to participate in the life and troubles of four island landscapes and to think along on emergent archipelagic claims towards sustainable and just futures.

Global Economic Prospects, Volume 9, June 2014 World Bank, 2014-06-10 The global economy got off to a bumpy start this year but growth in 2015 and 2016 looks to be broadly on track. Projections for developing countries in 2014 have been downgraded by 0.5 percentage points to 4.8 percent, mainly reflecting weak first-quarter growth in the US due to weather and the conflict in Ukraine. Going forward, growth is projected to firm to 5.3 and 5.5 percent in 2015 and 2016, supported by easy global financial conditions and rebounding exports as high-income countries continue to recover under the influence of a reduced drag from fiscal consolidation and improving labor markets. Financial conditions will eventually tighten, and when they do, there is risk of further volatility. Most developing countries are in good fiscal and financial shape but where vulnerabilities remain, countries need to tighten policy to reduce the potential impact of external shocks. Overall, growth for developing countries will be solid but not strong enough to generate the income and employment gains needed to eliminate poverty by 2013. As a result, countries need to focus on structural reform in order to lift growth in an enduring and sustainable manner.

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe. Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at

different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics

The Geography of Injustice Barak Kushner, 2024-03-15 In The Geography of Injustice Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan s empire At its conclusion one of the judges voiced dissent claiming that the justice found at Tokyo was only the sham

employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan s imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption The Geography of Injustice offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history *People's Force* Robert
